Freedom in motion.

GoFloaters
Spaces that work for you

Work is no longer a place you go. It’s a place you choose.

GoFloaters helps people find flexible spaces to work from. The brand’s job is to make that freedom feel light, friendly and dependable — a dog who knows where the good desks are, and an aircraft that gets you there.

Tagline (unchanged): Spaces that work for you.
Creative territory PROPOSED Freedom in Motion — an organising idea for campaigns and motion, never a replacement for the tagline.

The identity we start from

The supplied logo is the source of truth. Everything in this book is built from a vector reconstruction of it.

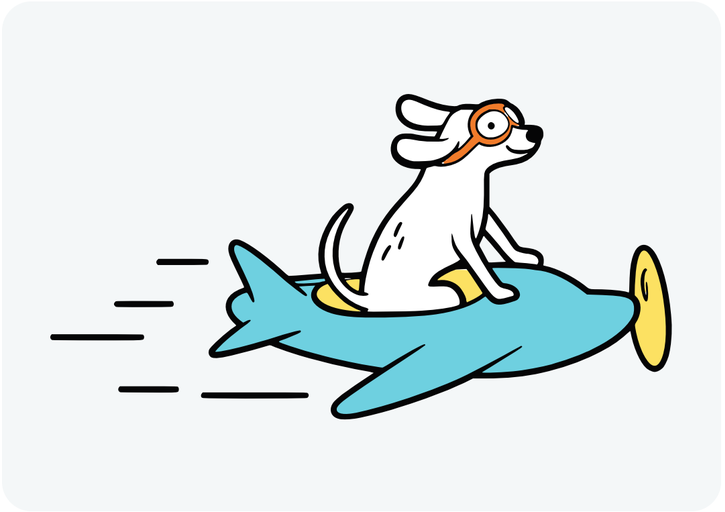

1 · The dog. Slim, white, hand-inked; long muzzle, small black nose, swept-back ears, orange eye ring.

2 · The aircraft. Turquoise single-prop plane with a yellow propeller disc and a cockpit seat.

3 · Wordmark + speed lines. “Go” bold, “Floaters” regular, grey tagline; five rounded speed lines.

Proposed direction: Freedom in Motion PROPOSED

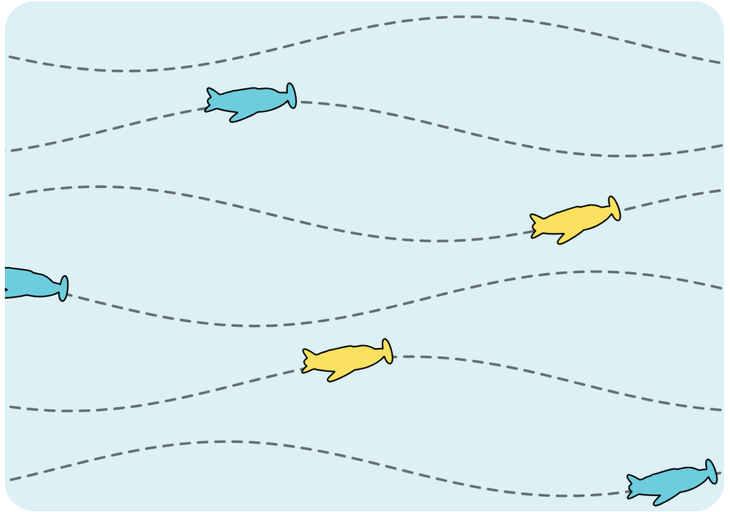

Faithful

One master character, one aircraft, one logo — reconstructed, never redrawn into something new.

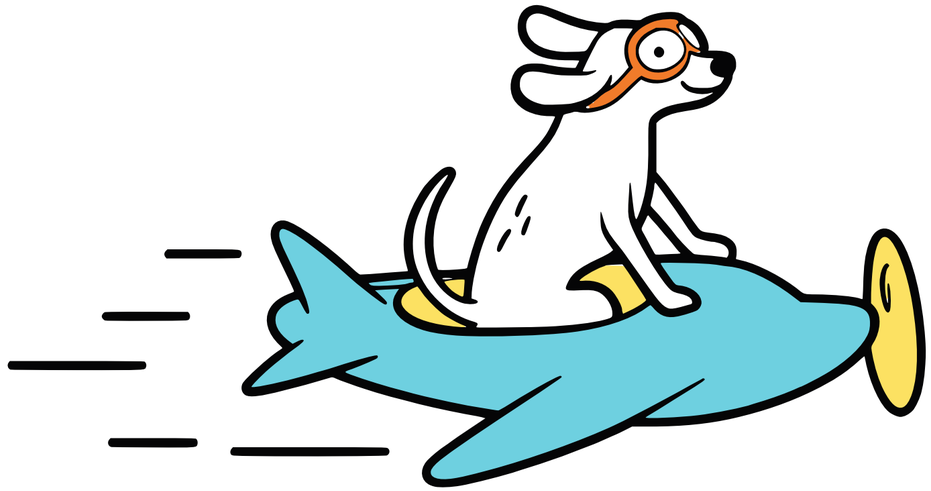

Expressive

Twelve expressions and twelve actions from the same rig, so the dog can speak in every channel.

In motion

Speed lines, flight paths and propeller discs become a graphic language that moves even without the mascot.

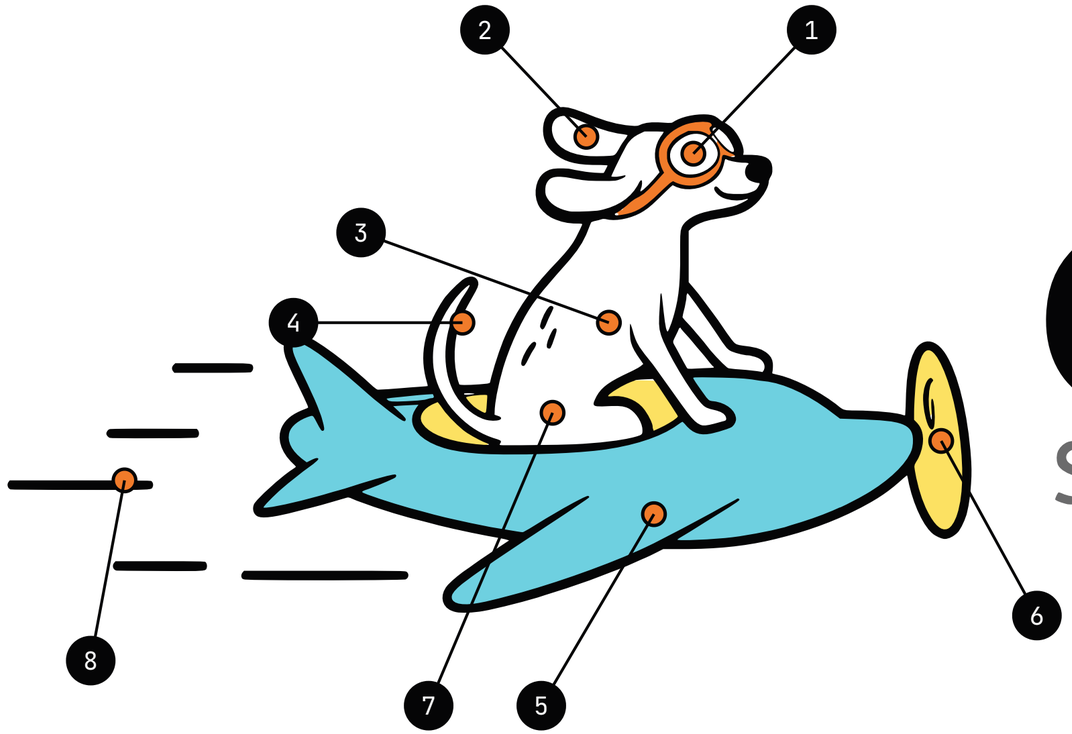

GoFloaters

Spaces that work for you

Traced from the supplied 2000×667 raster, colour-separated into six plates (white, turquoise, yellow, orange, ink, slate). Verified at identical size against the source: mean pixel difference 1.971/255, ink overlap 98.7% within 1 px. It is a reconstruction, not the original source file.

Anatomy

GoFloaters

Spaces that work for you

1 Eye + orange ring

2 Swept-back ears

3 Slim upright body

4 Curved tail

5 Turquoise aircraft

6 Yellow propeller disc

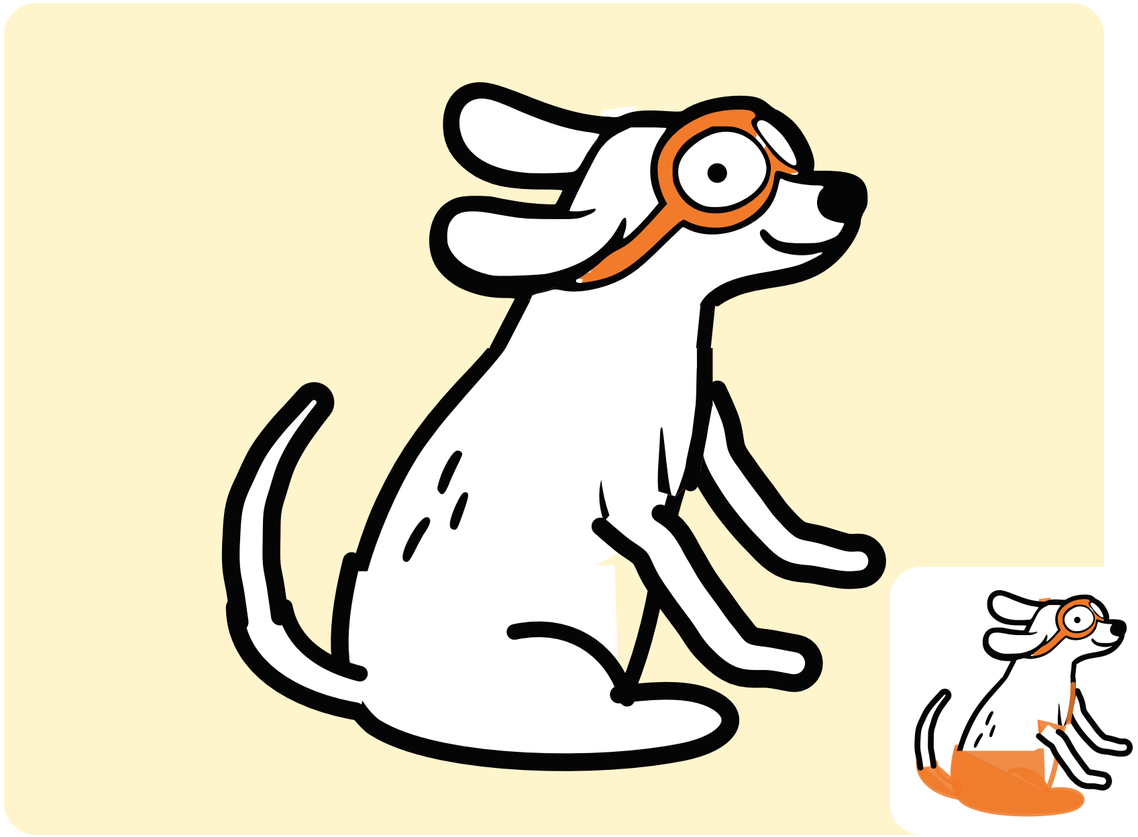

7 Cockpit seat

8 Five speed lines

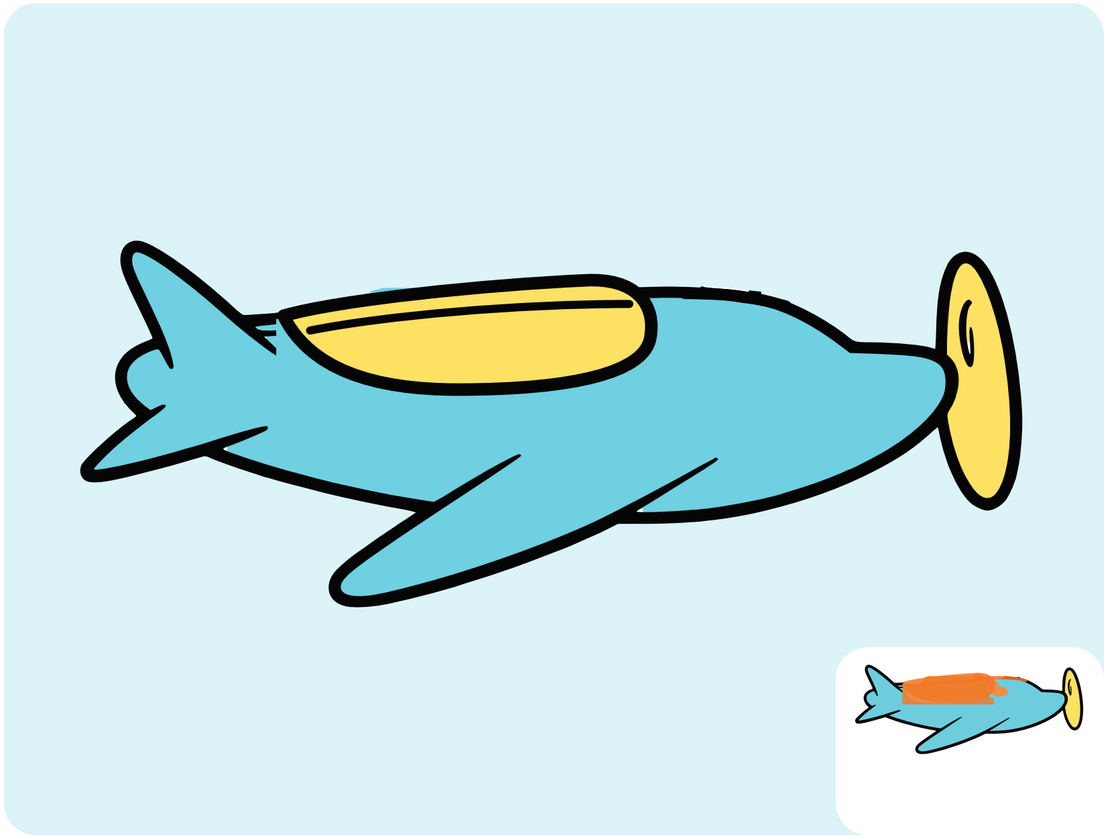

9 Wordmark: *Go* bold + *Floaters*

10 Tagline in slate

Dog and aircraft, separately

Mascot only. Extracted from the logo. Areas hidden by the aircraft (lower body, tail root) are reconstructions, shown in orange in the inset.

Aircraft only. The empty cockpit and the surface under the paws are reconstructions (inset). Neither element replaces the corporate logo.

Variants and grounds

Original · light

Dark ground + keyline PROPOSED

Turquoise ground PROPOSED

One-colour black PROPOSED

One-colour reverse PROPOSED

Without tagline PROPOSED

Stacked PROPOSED

Why: the unmodified art loses its outline on dark

Clear space, minimum size, misuse

X = HEIGHT OF THE “O” IN GO · KEEP 1X CLEAR ON ALL SIDES

Minimum size PROPOSED — Lock-up 160 px / 40 mm wide · symbol 48 px / 12 mm · mascot alone 32 px / 8 mm. Below these, use the symbol without speed lines.

Don’t stretch or squash

Don’t recolour the dog or aircraft

Don’t rotate the lock-up

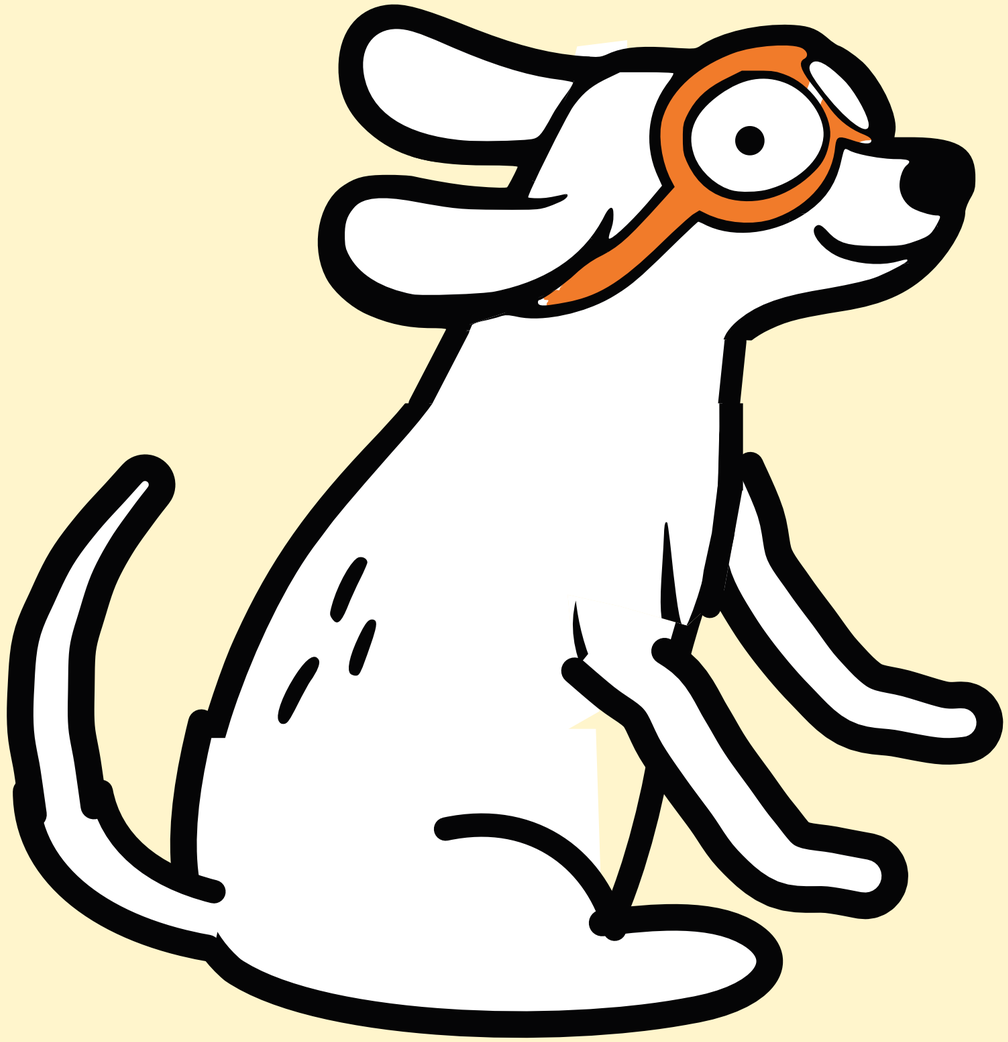

Don’t add effects or shadows

Don’t place on low contrast

Don’t re-set the wordmark in another typeface

The original mascot

Verified from the supplied logo — preserve all of these.

- Slim white body, hand-inked dark outline (~0.9% of symbol width)
- Elongated muzzle, small rounded black nose
- Two swept-back ears, near ear lower
- Orange ring around the eye (the only accessory)
- Long upright neck, seated posture
- Forelegs reaching forward, paws resting
- Curved tail rising behind
- Small three-stroke fur marks on the haunch

Never: puppy proportions, fluffy fur, big goggles, clothing, scarves or shoes.

Construction

Layered parts

Head (traced) · two ears (traced, hidden white roots) · procedural neck · torso (traced) · near and far forelegs, tail (redrawn as centre-line “tubes” matched to the source) · eye (white, pupil, two lids) · mouth (traced smile ↔ procedural shapes).

Pivots

Orange dots mark every joint: head, ears, hip/lean, shoulders, wrist, tail root, propeller hub, wing root and the seat anchor that keeps the dog in the cockpit.

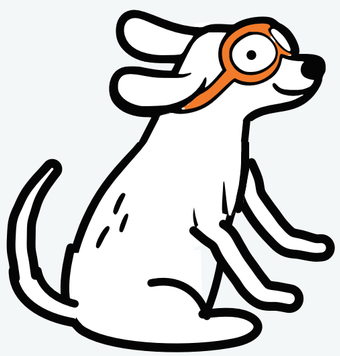

Line weight

7.6 px at master scale (2000 px wide lock-up). Redrawn limbs use the same weight so joints never thicken.

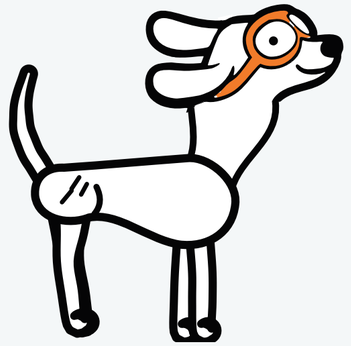

Profile and constructed views

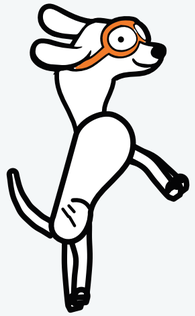

Profile · logo pose · Source

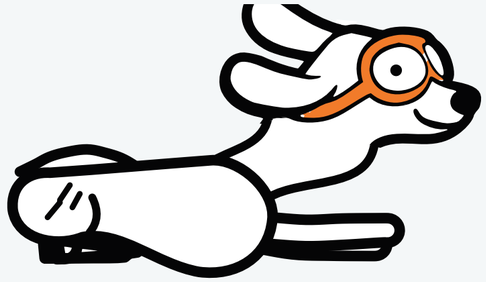

Profile · seated, detached · Reconstruction

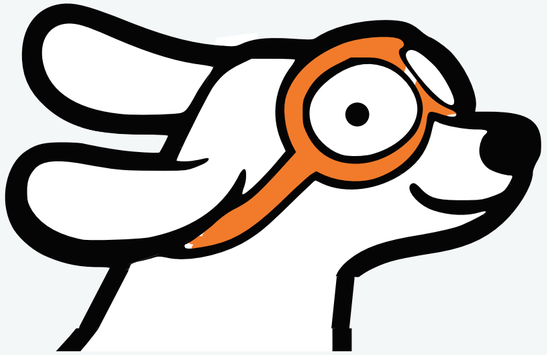

Standing profile · Proposed view

Upright (dance, celebrate) · Proposed view

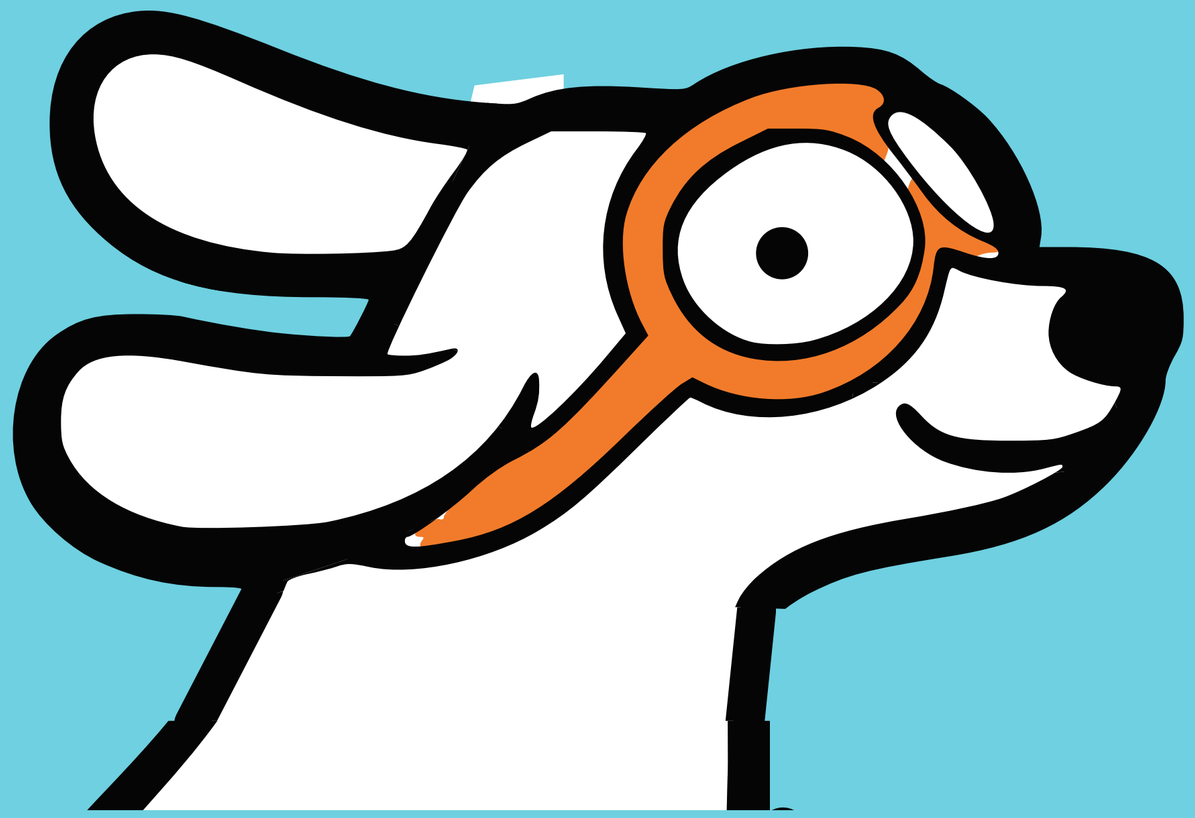

Lying (sleep) · Proposed view

Head detail · Source

A frontal view is not supplied here: the source shows only a profile, and inventing a front face would risk identity drift. Recommended next step: an illustrator-led front and three-quarter turnaround approved against this book.

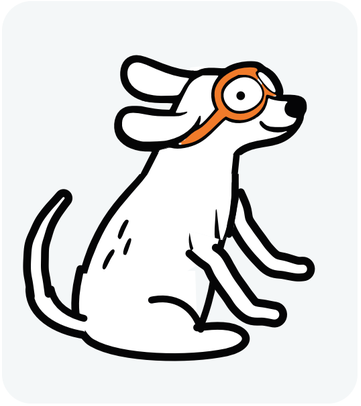

CORE PERSONALITY PROPOSED

Easy-going. Curious. Dependable.

The hero expression is the logo face: calm eyes, a closed smile, chin up and looking ahead. Every other expression starts and returns here.

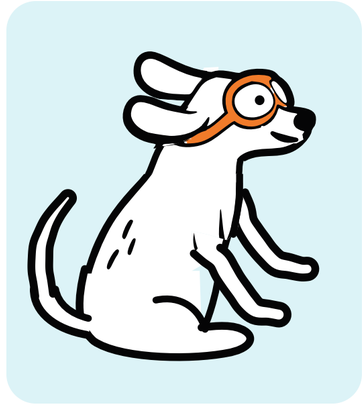

Twelve expressions · one character

Neutral
Calm, attentive default. · Logo, navigation

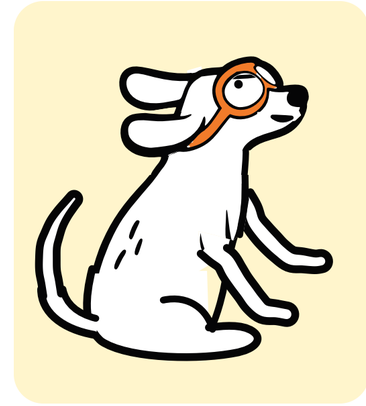

Happy
Warm welcome. · Confirmations, replies

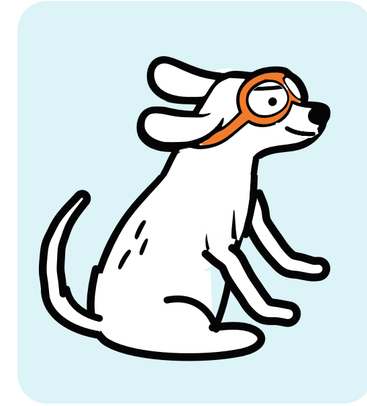

Curious
“What’s around here?” · Search, discovery

Excited
Something great appeared. · New spaces, launches

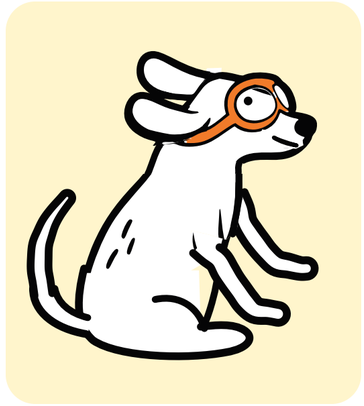

Thinking
Weighing a choice. · Loading, comparisons

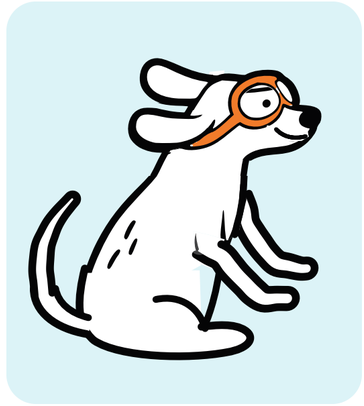

Focused
Heads-down work. · Productivity content

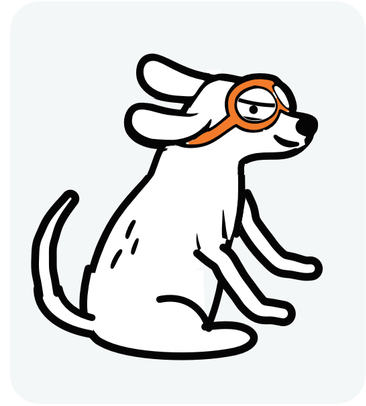

Surprised
Unexpected news. · Alerts, notifications

Confused
Something doesn’t add up. · Errors, not-found

Determined
Let’s do this. · CTAs, onboarding

Sleepy
Winding down. · After-hours, idle

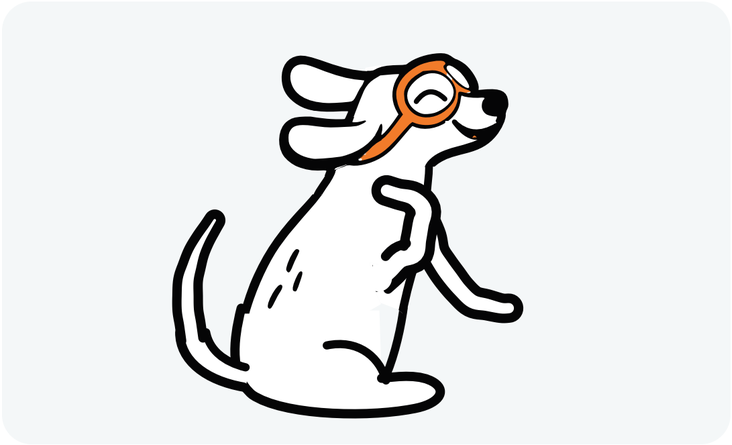

Relieved
Problem solved. · Resolved, saved

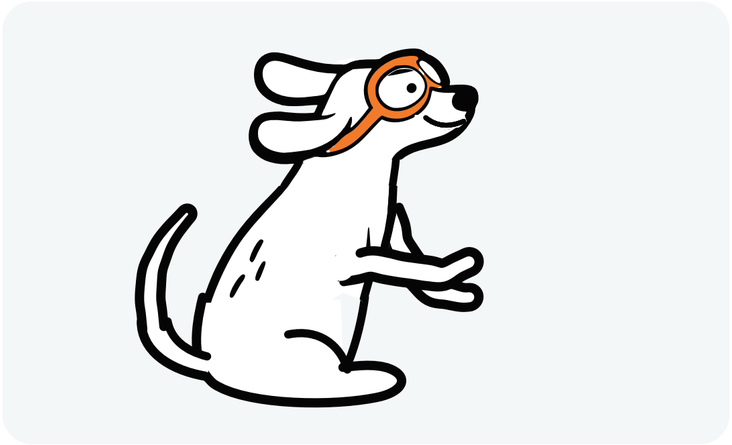

Celebrating
A big win. · Milestones, events

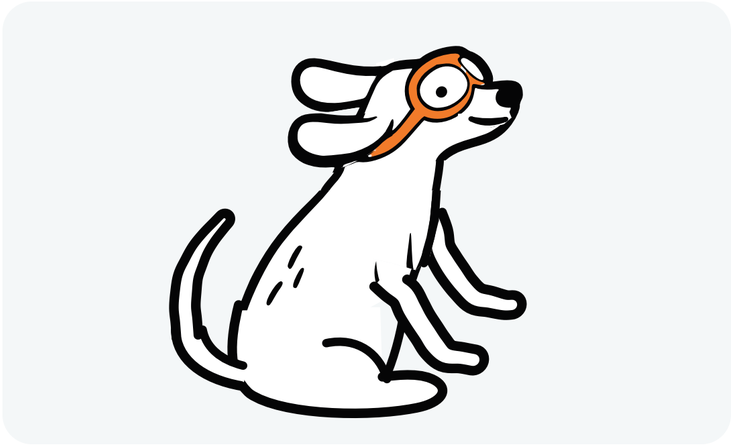

Expressive poses

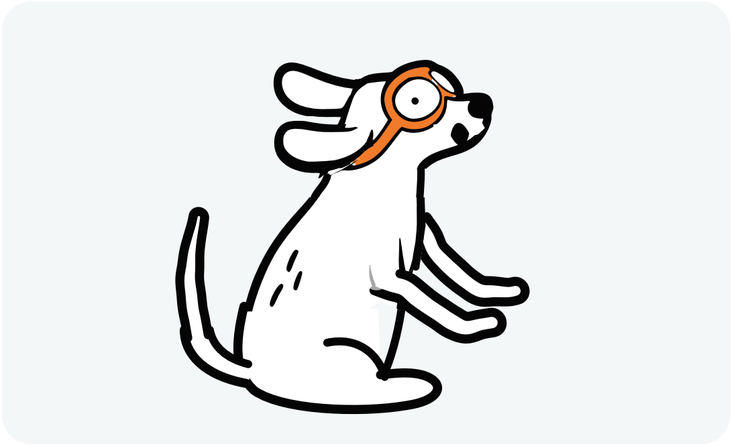

Waving · Greeting, welcome

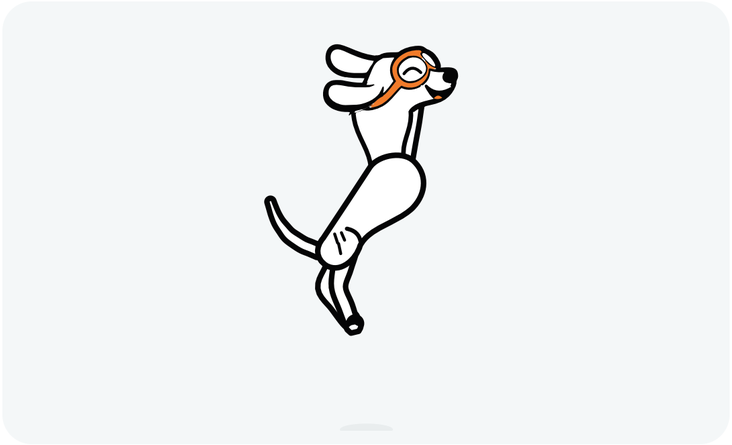

Pointing · Directing to a CTA or place

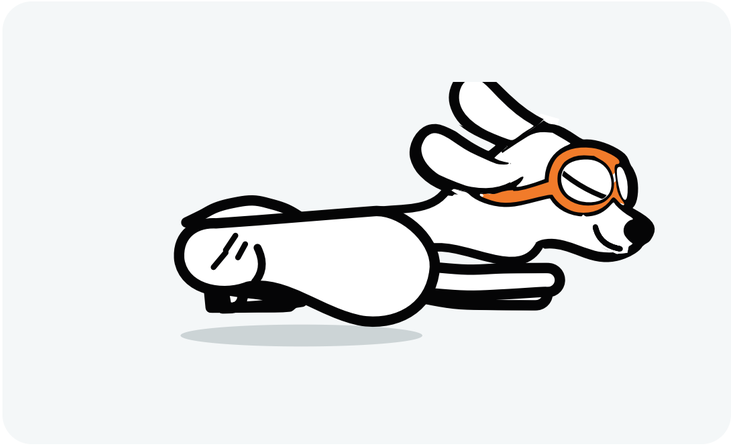

Searching · Search, empty results

Reacting to surprise · Alerts, reveals

Celebrating · Success, milestones

Sleeping · Closed hours, idle

A working rig, not a drawing

```
root
├─ trails ×5
├─ aircraft  bank · position · scale
│  ├─ fuselage · tail fin · stabiliser
│  ├─ wing      flex
│  ├─ cockpit   seat / empty
│  └─ propeller disc · blade glints · blur
├─ dog       attach ↔ detach · flip
│  ├─ torso   lean · breath
│  │  ├─ tail       wag · curl

```

Rig proof: blink, eyes, head tilt, ear follow-through and paw lift; the aircraft flying on its own while the propeller spins; then dog-only, aircraft-only and full-logo modes. Source: `03_CHARACTER_RIG/RIG_SOURCE`.

Motion principles

01

Eyes lead

Pupils move first; the head follows 3–5 frames later.

02

Ears follow

Ears trail the head by ~4 frames, small amplitude (±5°).

03

Never all at once

Aircraft, dog, propeller and trails start and settle on different frames.

04

Glide, then settle

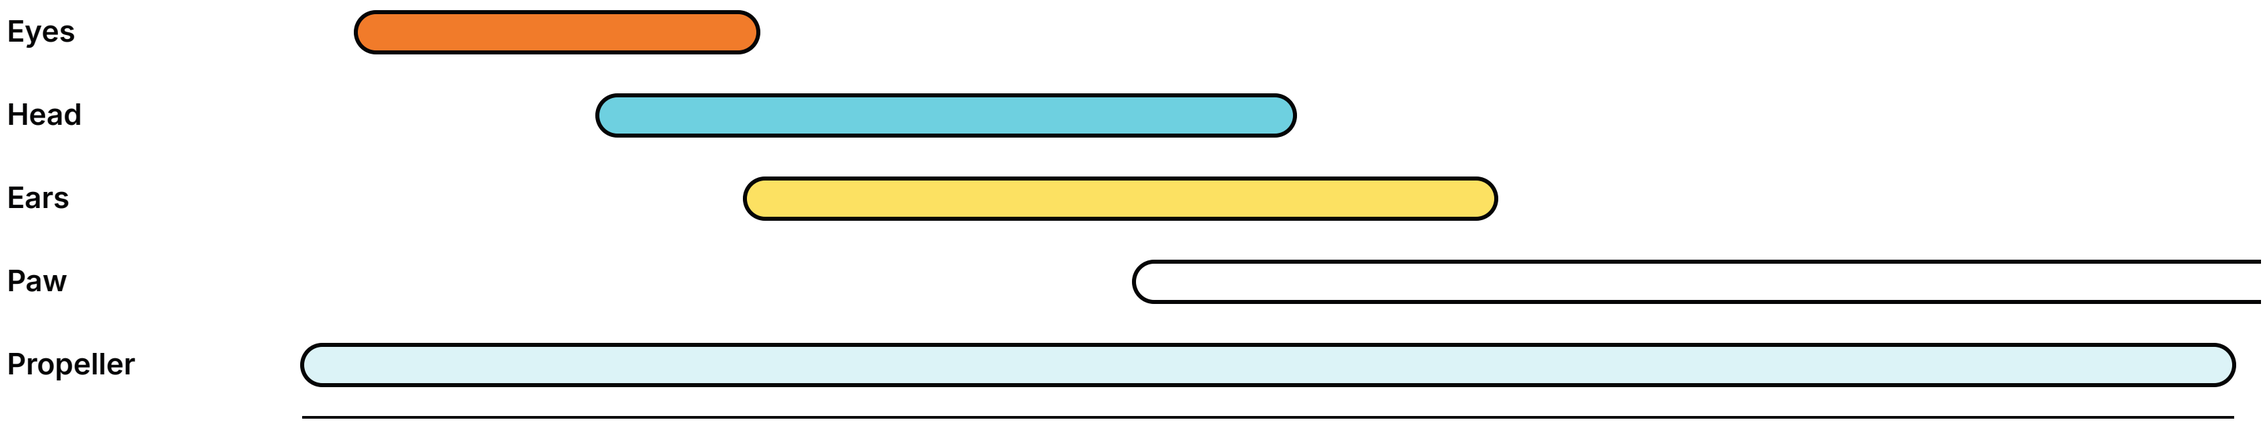

Ease-out arrivals; a soft overshoot on the aircraft only.

05

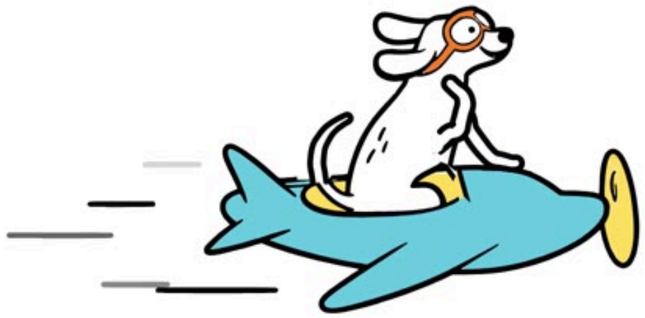

Land on the logo

Every brand sequence resolves to the master lock-up.

STAGGER · signature hero, 3.2 s → 4.4 s

Signature hero · 9 s

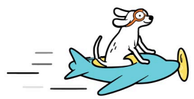

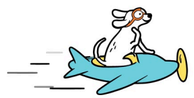

▶ Motion · plays in the interactive edition

0.3 s speed lines streak in · **0.4–2.3 s** aircraft glides in, banking, propeller blurred · **3.2 s** eyes find the viewer · **3.4 s** head lifts, ears trail · **4.0–6.0 s** paw greeting · **6.0 s** wordmark rises letter by letter · **6.9 s** tagline · **7–8 s** propeller and trails settle · **8.85 s** locks to the master logo.

Deliverables: 1080p H.264, reduced-motion version, transparent WebM, final still.

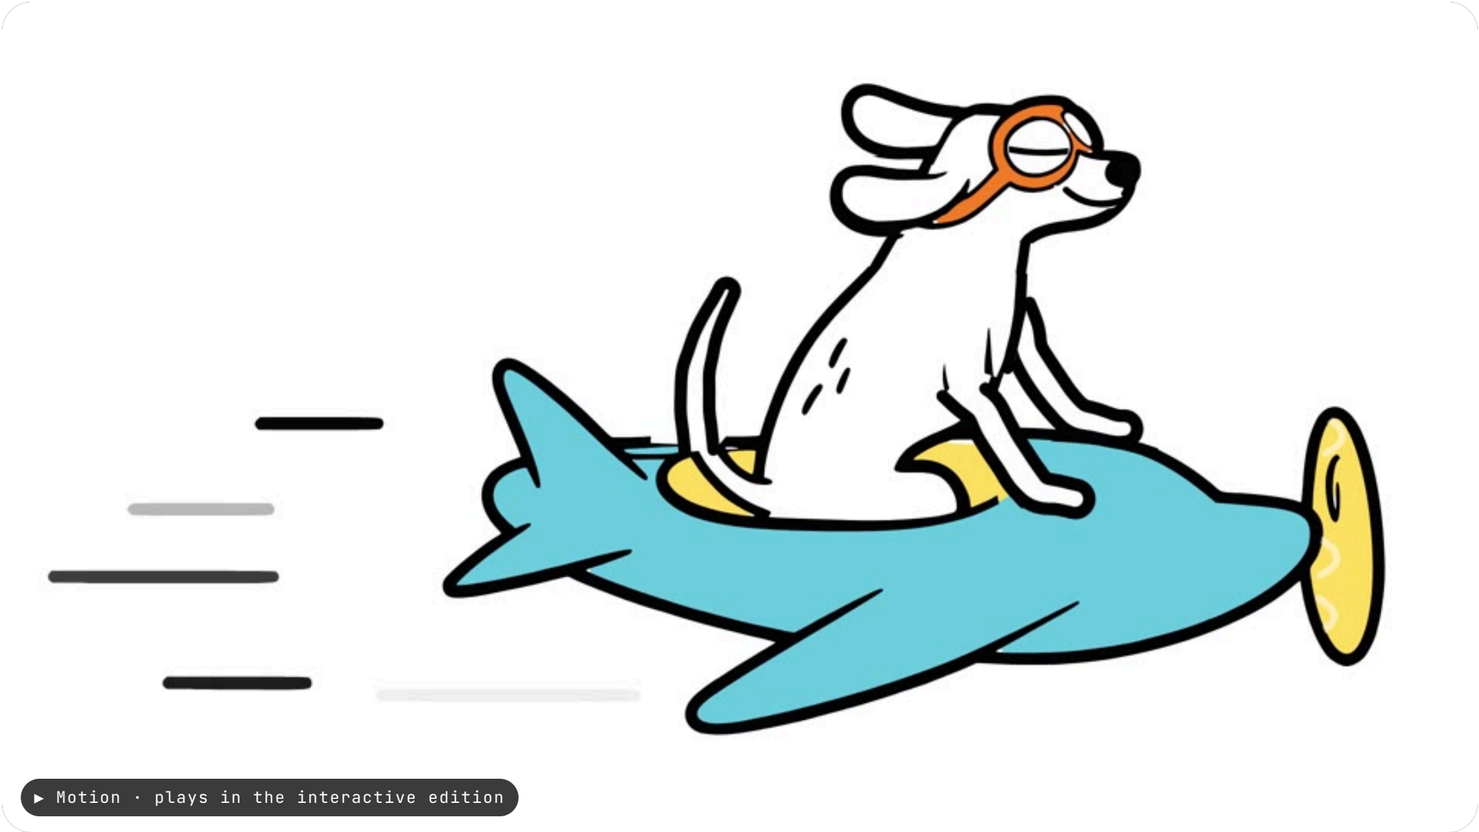

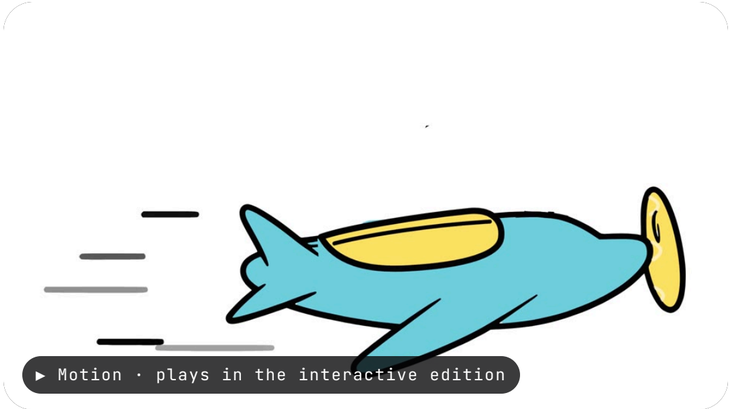

Flying and aircraft actions

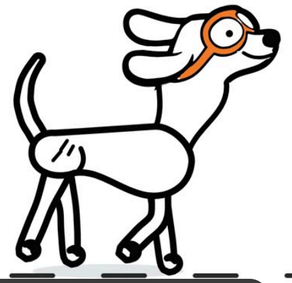

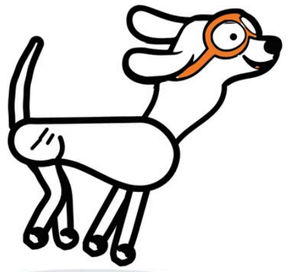

Flying — bank ±3°, gentle bob, wind on the ears, squint, propeller blurred. **Aircraft only** — the plane travels without the dog; the cockpit shows empty. **Propeller** — spin-up and settle: blade glints sweep the disc, then a white blur takes over.

Dog-only movement and gestures

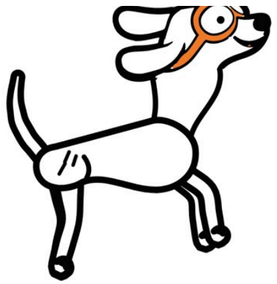

▶ Motion · plays in the interactive edition

Walking — 1 s cycle

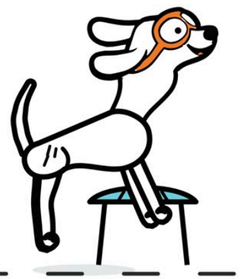

▶ Motion · plays in the interactive edition

Running — 0.55 s cycle

▶ Motion · plays in the interactive edition

Jumping

▶ Motion · plays in the interactive edition

Overcoming an obstacle

▶ Motion · plays in the interactive edition

Dancing — 120 bpm

▶ Motion · plays in the interactive edition

Waving

Walking, running and jumping use the constructed full-body view PROPOSED VIEW: same head, same line weight, legs bend on their centre-lines and paws stay planted on the ground line.

Expression transitions

▶ Motion · plays in the interactive edition

Each change takes about 0.5 s: eyes and lids first, mouth next, head and ears last — then a hold. The basic geometry never changes, only the face controls and the head.

Typography

HERO HEADING · BRICOLAGE GROTESQUE EXTRABOLD · 160/146

Fly by.

SECTION TITLE · BRICOLAGE GROTESQUE EXTRABOLD · 72/72

Spaces that work for you

SUBHEADING · INTER SEMIBOLD · 36/44

Find a desk in minutes, not meetings.

CAMPAIGN COPY · BRICOLAGE GROTESQUE SEMIBOLD · 44/48

Out of office? Into one.

INTERFACE LABEL · JETBRAINS MONO SEMIBOLD · 16 · +8% TRACKING · CAPS

DAY PASS · MEETING ROOM · DESK

SUPPORTING TEXT · INTER REGULAR · 20/30

Body copy stays short and warm. Explain once, then get out of the way.

The wordmark is artwork

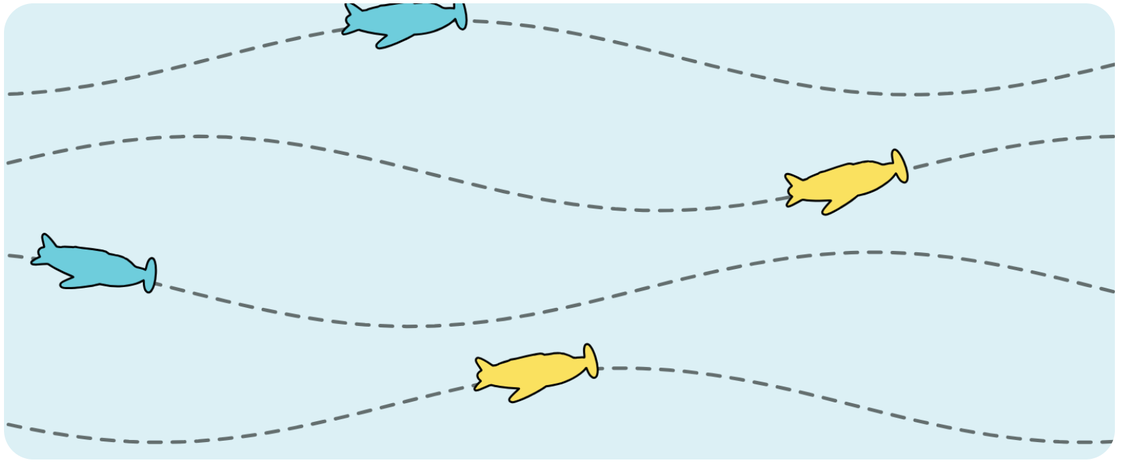

"GoFloaters" is preserved exactly as traced from the supplied logo. Its typeface is not identified here and the wordmark is never re-typed.

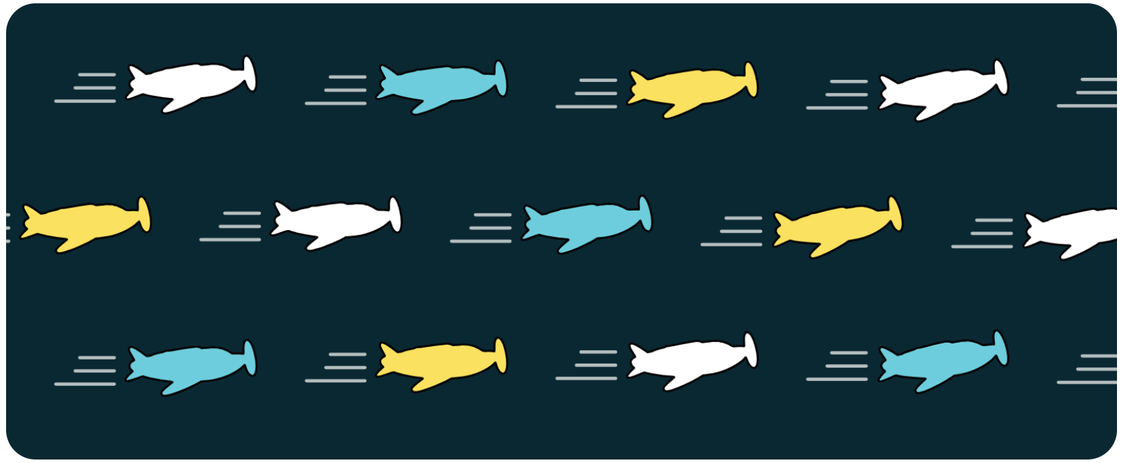

Recommended families PROPOSED

Bricolage Grotesque (display), Inter (text, UI), JetBrains Mono (labels). All SIL Open Font License; files in 06_BRAND_IDENTITY/typography/fonts.

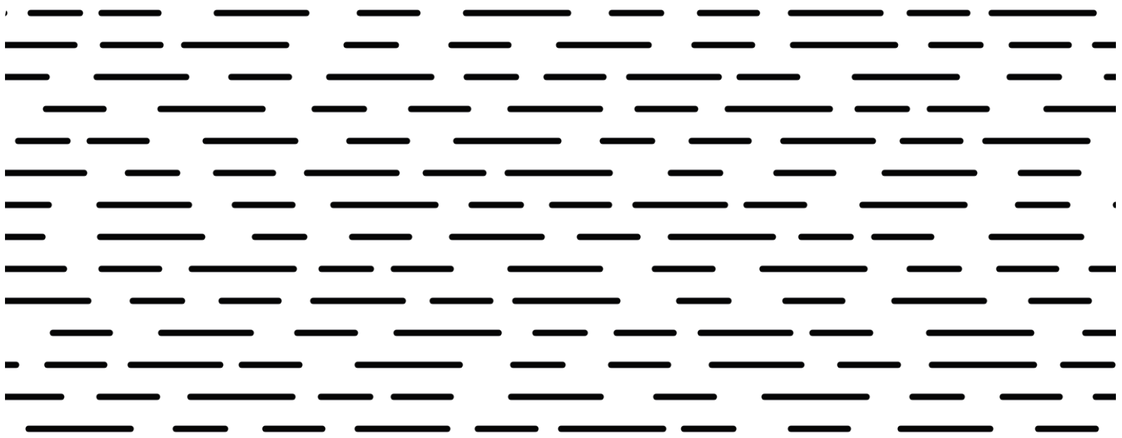

Patterns from the aircraft PROPOSED

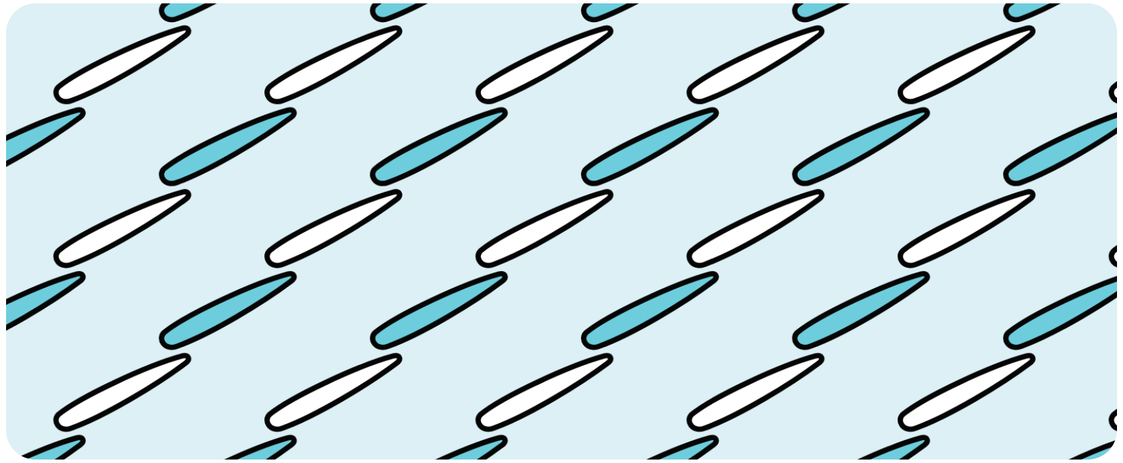

Flight paths · aircraft silhouette on dashed routes

Tossed aircraft · silhouette + trailing speed lines

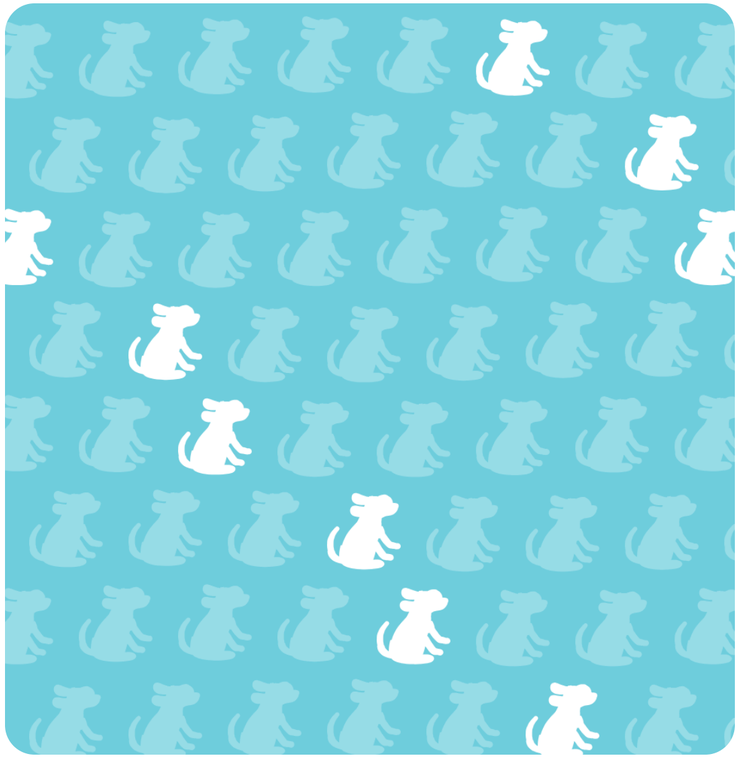

Speed lines · the five original line lengths as rhythm

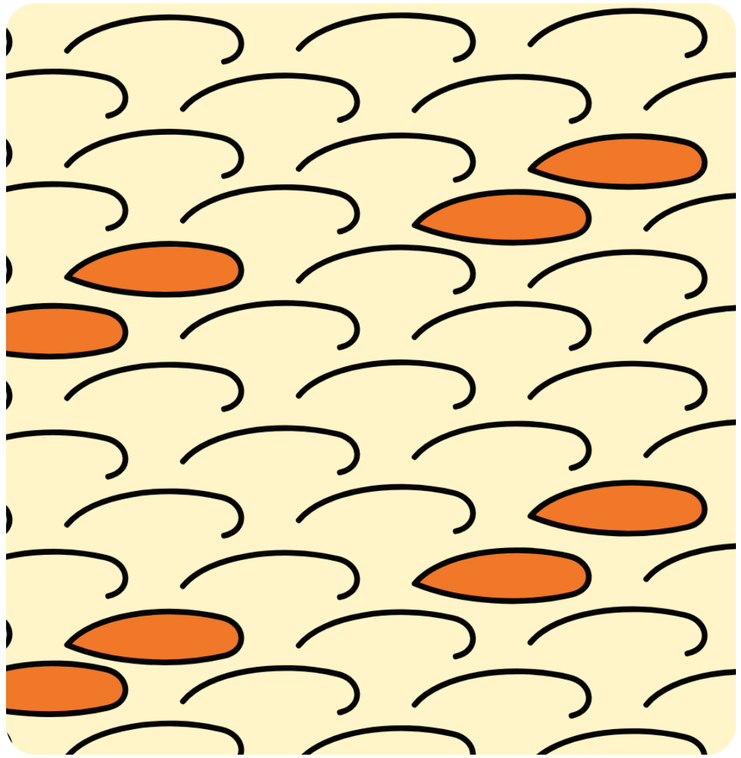

Wing formation · the near-wing outline as a chevron

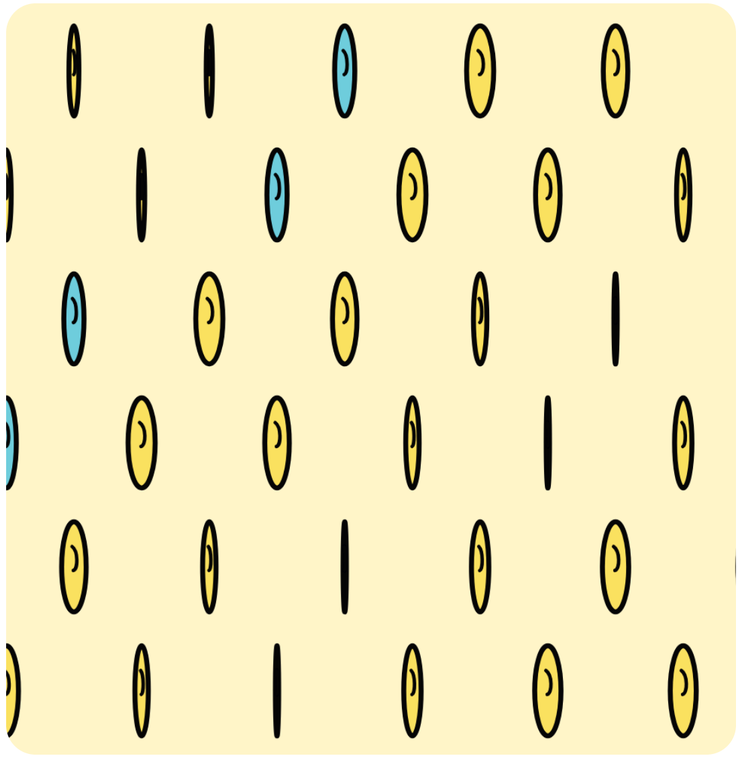

Patterns from the mascot and propeller PROPOSED

Mascot silhouettes · tone-on-tone seated dog

Ear curves · the swept-back ear contour

Propeller discs · disc + spinner curl, animated squash

Static SVG/PNG in 06_BRAND_IDENTITY/patterns; seamless animated loops in 05_ANIMATION/pattern_motion. No generic stars, sparkles or icons — every motif traces back to the logo.

Gradients and backgrounds PROPOSED

Sky · `(180DEG,#DCF3F7,#FFFFFF)`

Turquoise lift · `(135DEG,#6ED0E0,#DCF3F7)`

Morning · `(180DEG,#FFF5CC,#FFFFFF)`

Night flight · `(160DEG,#0E2A33,#163E4A)`

Gradients stay restrained: two neighbouring brand colours, vertical or a gentle diagonal. Never gradient the dog or the aircraft themselves.

Composition principles

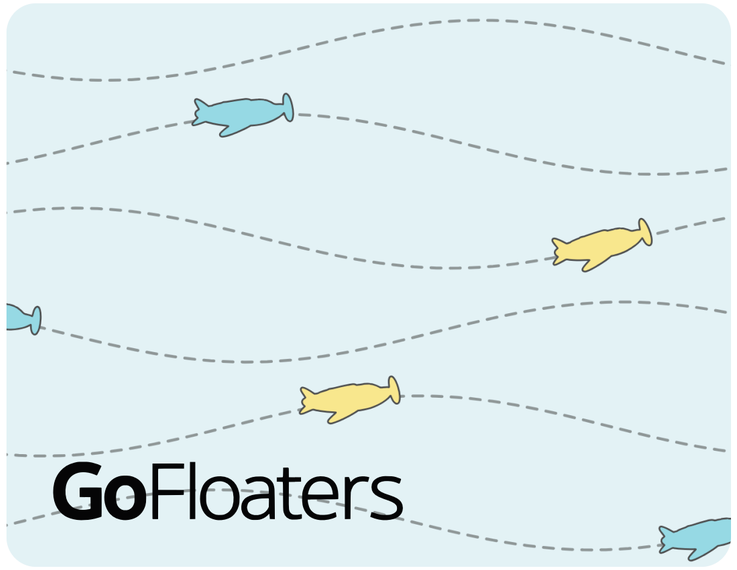

Headline left, flight right

The aircraft always travels towards the open side of the layout.

The mascot directs attention

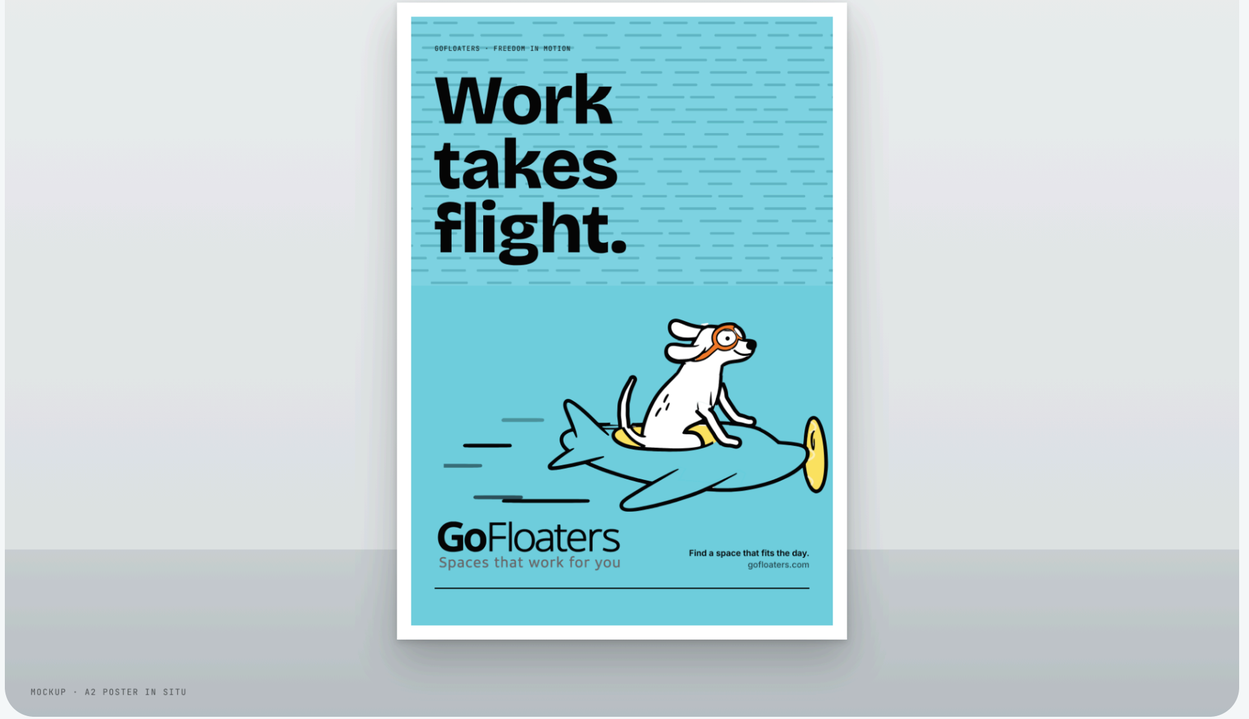

Eyes and paw point at the message; never at the edge of the page.

Air to breathe

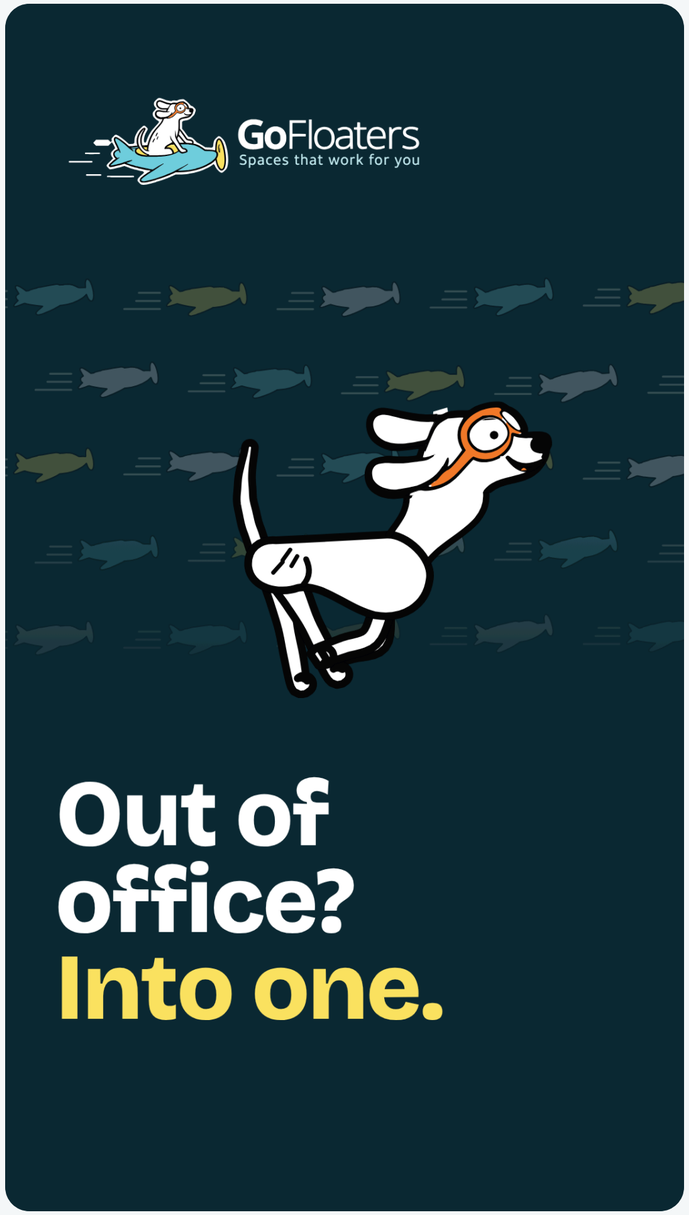

Keep at least 40% negative space. Patterns sit back; the logo sits forward.

A2 campaign poster: full identity, headline in the display face, aircraft flying into open space.

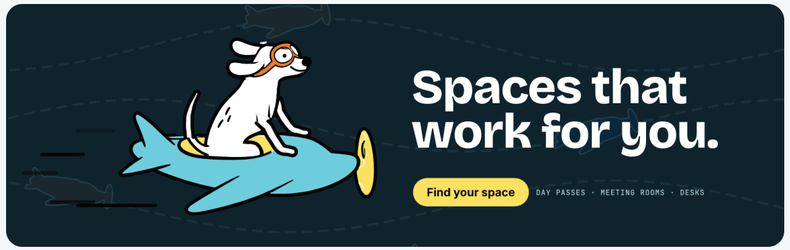

Social posts use single expressions or actions; banners use the aircraft alone when space is tight.

PROPOSED ENGAGEMENT GAME · SEPARATE FROM THE BOOKING PLATFORM

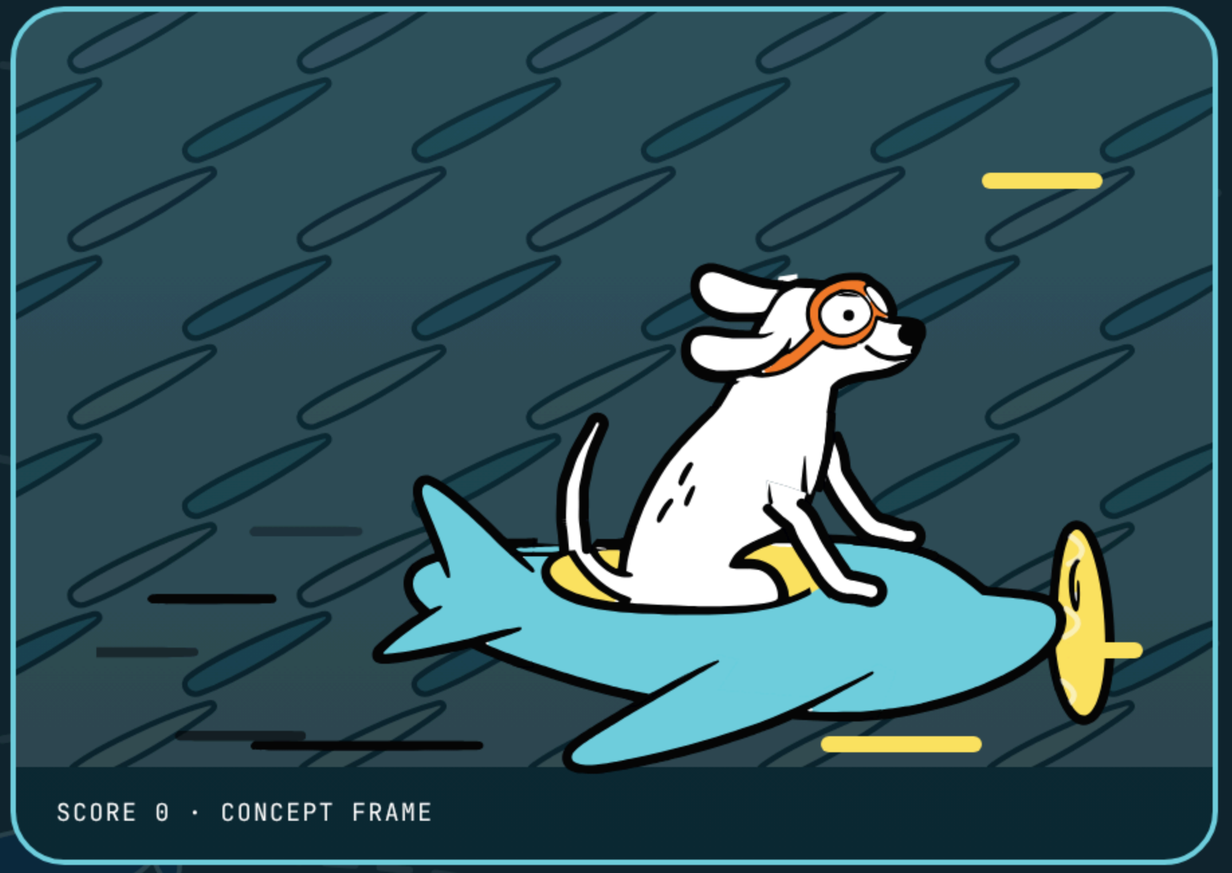

GoFloaters
Spaces that work for you

FLOATER FLIGHT

Steer the aircraft through the city, collect speed lines and discover neighbourhoods along the way.

PLAY

How to play

Proposed engagement game. Deep Sky ground and arcade energy keep it visibly separate from the booking product.

GAME CONCEPT · NAME, MECHANICS AND SCREENS ARE PROPOSALS ONLY

Source notes and production record

What was inspected

The supplied 2000×667 GoFloaters logo (PNG/WebP). The Navi by VNGGames Behance project could not be opened from this production environment (network policy blocked behance.net), and no PDF or screenshots of it were supplied. No description of its panels is given here, and nothing in this book copies it.

Original vs proposed

Original: the logo, its colours, the dog, the aircraft, the wordmark, tagline and speed lines (reconstructed in vector). Proposed: everything tagged PROPOSED — the creative territory, supporting colours, typography, patterns, logo variants, constructed body views, the game and screen concepts.

Fidelity

Reconstruction vs source at identical size: mean difference 1.971/255; 98.7% of outline pixels within 1 px. The rig's rest pose matches the master to 0.447/255; the limbs and tail are redrawn as centre-line tubes so they can bend.
